

## Mineral Lick

### Witaminy i minerały

### Mineral Feed for horses and ponies

- weatherproof
- for any horses kept in groups
- for year-round supply of minerals
- for pasture, active stable and open stable systems
- compensates for sodium deficits in conventional feed
- independent intake in addition to forage based diets

Minerals such as calcium, phosphorus and sodium as well as trace elements such as zinc, copper and selenium are important nutrients for bone stability and for maintaining various processes like metabolism and immune system. Since the nutrient content in hay or grass fluctuates greatly and forage only diets can not cover the daily demand of trace elements, a supply gap quickly arises here.

Irrespective of the type of husbandry, age or performance requirements, the year-round supply of minerals in addition to roughage forms the basis of daily horse feeding.

Eggersmann Mineral Lick is specially designed for horses and ponies kept in groups or when daily manger feeding is not possible. The minerals it contains ensure to cover the maintenance needs of horses and ponies. The moderate molasses content makes our Mineral Lick very tasty, but at the same time prevents disproportionately high intake. In this way, horses and ponies can take what they need by themselves.

### Dawkowanie:

### Application notes:

Eggersmann Mineral Lick offers free feed intake for horses and ponies on grass, in active stables or open stable systems. For a secure footing, we recommend placing the Mineral Lick in a worn-out car tire.

10 kg: for groups up to 6 horses  
25 kg: for groups of 10-12 horses

The daily intake per horse is around 50 - 80 g.

**Sklad:** 26,1 % chlorek sodu, 24,7 % węglan wapnia, 17,6 % Fosforan sodowo-wapniowy, 11,0 % Melasa buraczana, 8,0 % Monocalcium phosphate, 6,8 % tlenek magnezu, 2,4 % otręby pszenne

**Analiza:** 16,00 % wapń, 11,00 % sód, 5,00 % fosfor, 4,00 % magnez

**Dodatki żywieniowe w 1kg:** 1.500 mg żelazo (3b103) (siarczan żelazawy monohydrat) <sup>NA</sup>, 800 mg miedź (3b405) (siarczan miedzi pięciowodny) <sup>NA</sup>, 4.000 mg mangan (3b502) - tlenek manganowy <sup>NA</sup>, 6.000 mg tlenek cynku (3b603) <sup>NA</sup>, 50 mg

bezwodny jodan wapnia (3b202) <sup>NA</sup>, 25 mg selen (3b801) - selenian sodu <sup>NA</sup>, 10 mg  
Cobalt (3b304) (Coated cobalt (II) carbonate granules) <sup>NA</sup>
